

Staff wellbeing and occupational health

The most important investment a school can make is an investment in its people.

Staff wellbeing is key to school success. A school with a culture and ethos of supporting wellbeing will enable all staff as individuals and groups, to manage successfully the pressures they face.

For more information see the whole school approach section which highlights school practices to support health and wellbeing of all staff.

Occupational health is delivered by Medigold Health's suite of health and wellbeing services which caters for every aspect of our corporate health strategy and will enable us to take good care of our employees and keep them in work, safe and well from the moment they join our organisation.
