The Family Partnership Model

The Family Partnership Model aligns the different aspects of schools' work with parents and families under **5 Key Themes**, with an overarching theme of monitoring and evaluation cutting across all areas:

Theme 1: Fostering effective family-school partnerships

Theme 2: Communicating & consulting effectively

Theme 3: Enabling parental engagement in learning

Theme 4: Empowering parents and carers to develop their own skills

Theme 5: Supporting successful transitions

The process will support schools to review their provision from the view point of senior leaders, teaching staff, support staff, governors and parents.

"We would encourage all schools to take part in the FSPA award. We have really enjoyed it and through regular meetings with the FSP we have been able to track our progress at each stage [both] tangible results (policy, training package) and non-tangible results (amazing experiences and interactions with our parents) – these we will particularly cherish."

"The FSP have really facilitated this process making it very smooth and achievable. The framework has led to enlightening moments where we have touched on/learnt things, we would not have considered otherwise."

"We would definitely tell other schools how positive the process has been; it has provided opportunities to meet with staff from other schools and discuss the similarities in our struggles with parental engagement and effective ways they have been tackled".

"The FSPA has been very useful in building positive relationships with parents and strengthening the school community. There is a general air of positivity and parents, and staff alike are developing a positive outlook with each other"
